

Website section / page template	Title of change	Details	Association recommendation	LTI recommendation	Our priority level	Accessibility notes
Landing page template	Number of tiles	Increase maximum number of tiles from 9 to 45	✓		High	
Static pages	Event feed	The facility to feed events to a specific static page.	✓			
Homepage	Number of visible news, events and roles	Ability to show up to five items on the homepage	✓			
Homepage	Quotas of visible news, events and roles	Currently the same number of each data type has to appear on the homepage. This show always be five of each, unless there are less than five published. Same for microsites.	✓			
Homepage	Links to further news, events and roles	Add "more news", "more events" and "more roles" under the feeds for each data type	✓	✓		
Homepage	Format of dates on the news, events and roles	Monday, 1 January 2019 format	✓			
Homepage	Video player	We'd like a video player on the homepage and landing page template that can play multiple YouTube embedded videos and switch between them.	✓			
All templates	Embed videos	We need to be able to embed videos on pages in a responsive container on any page type. Currently if these are manually inserted in the code, they are stripped out if the page is resaved.	✓			
Events template	Events calendar	We would like to also show events in a calendar as well as a map. This should sit next to the map and show events on a week view with controls to move to the next week or month. The event title should show.	✓			
Society template	Video and events	This template needs the facility to have an embedded YouTube video and an events feed if the event is tagged to that society.	✓			
New feature	Change It	Student Ideas platform where ideas can be submitted and voted upon. The platform should be viewable but voting and submission behind a log-in. Email alerts to Student Voice to review and publish the idea, and when an idea gets a set number of positive votes.	✓		High	
Search function	Search speed	https://www.mdxsu.com/thestudentvoice The performance is too slow	✓			
Home page main navigation	Colours in the navigation bar	The participants liked the combination of the white text and coloured backgrounds in the navigation bar and one student would have liked them to be brighter and lighter. Unfortunately, these colour combinations don't have sufficient contrast to meet the W3C AA standard for small text so they are likely to be hard to read for some visitors even if they only have minor impairments. Recommendation: Increase the contrast between the text and the background colours. THIS NEEDS CHECKING WITH RNIB to see if font size can be increased		✓		
Home page	Font size and colour of news events and volunteer role dates in feeds	Recommendation: Increase the size of the text for the dates and make the text a darker shade of grey to increase the contrast.		✓		
Home page and section homes	Banners - addition of real text to banners	Avoid text in images and use real text to communicate information wherever possible. We need the facility to upload and image and then add text into the banner set-up to be read over the image. Text would be configurable in different colours		✓		
Home page and section homes	Banners Carousel	Indicate the number of items in the banner carousel and the position of the visible items in the carousel		✓		
My Account	Welcome email	When a student registers, send them an email that explains what they can do now they have registered.		✓		
Web forms	New type of form	Our open (non-account) forms are heavily spammed and we can't use the Google Captcha because RNIB say it is not fully accessible. We need a form which starts with the privacy statement and then goes through to the fields - and isn't spammed.	✓	✓		

		<p>Turn fields that have a limited range of responses with standard formats (like faculty names and gender) into drop down menus. This will make it easier for students to complete and give you data that is easier to analyse. Spell out abbreviations like HLM in full the first time they are used. Explain what an extended member is. Make it clear in the field description what the student needs to type in this field and, if it is only worth filling in if they know when this will be, include the words 'if known' in the field description. If this is a year provide a drop down menu. Pronoun - Make it clear what this question refers to or remove it. We need to be able to manage drop down and options without tickets.</p>	✓	✓
My Account	Register form			
		All front end fields need to be available in the Member section backend. Many fields are missing. Unused fields and tabs need deleting	✓	
My Account	Register form			
		Use the data collected in the registration form to reduce the amount of information that needs to be collected on other forms. This needs to be done by feeding the data through to a web form, allowing the user to edit it if required and update the account. This could be done by inserting some code in the webform. The form needs linking with the UID and we need the option downloading the full account fields with the associated web form fields. This is needed for web forms and role applications. When the webform data is downloaded (Form submissions), or viewed, we need the information in the columns in the order of the webform (account details, then the extra fields).	✓	✓
Web forms	Insert account fields into a webform and download them			
		When the cookies are accepted, the URL changes and a new line in analytics is recorded, which messes up the stats a little. Please ca the URL stay the same when the cookies are accepted.	✓	
Google Analytics	Analytics and cookie acceptance			
		Please remove the filter. The roles should be shown like the /news homepage with a title, icon and excerpt where the role key information can be added. However the date needs to be the closing date. Account forms, role forms, all brought into the same style of web forms. Any small grey text on My account needs to be black and larger font. Same submit buttons on all forms.	✓	
Volunteer search roles	New concept			
		https://www.oustudents.com/student-led-projects-leader-volunteering-button needs to be same as CTA		✓
All forms	Consistency of forms			
Volunteer search roles	Button consistency			
		Can we look into an improvement of the social feed, showing images and reconnecting Facebook. Investigate latest with Instagram feed - is this possible?	✓	
Social feed	Fix the social feed
